

Spartan Chemical Company, Inc.

Letter of Guarantee:
**SPARCLEAN METAL SAFE
MACHINE DISH DETERGENT [58]**

Spartan Chemical Company, Inc., as the manufacturer of SparClean Metal Safe Machine Dish Detergent [58], guarantees that this product is safe and effective for use in food processing plants, including federally inspected facilities, when used as directed on the product labeling and as directed below in this letter. When used in this manner this product will not adulterate food product or create unsanitary conditions. SparClean Metal Safe Machine Dish Detergent [58] is a liquid warewash detergent for use in automatic dishwash machines which is specially formulated to protect pot & pans and other metal surfaces.

When requested by the Canadian Food Inspection Agency (CFIA), Spartan Chemical Company, Inc., will provide all supporting documents to demonstrate that the product is safe and/or suitable for use as intended.

SparClean Metal Safe Machine Dish Detergent [58]: Complies with the Following USA Requirements:

- Complies with the Federal Food, Drug and Cosmetic Act.
- Conforms to Food Safety and Inspection Service (FSIS)'s "Sanitation Performance Standards Compliance Guide"
- Meets the profile of USDA's former "A2" "Compounds for use as a cleaner in soak tanks or with steam or mechanical cleaning devices in all departments".

Before using SparClean Metal Safe Machine Dish Detergent [58], food products and packaging materials must be removed from the area or carefully protected. After using this product, surfaces must be thoroughly rinsed with potable water.

Directions for use:

1. Scrape and Pre-rinse dishes before washing.
2. Properly rack and load dishes according to machine manufacturer's directions.
3. SparClean Metal Safe Machine Dish Detergent may be used with a probe or probeless dispenser. Set dispenser according to the manufacturer's directions.
4. **For High and Low Temperature Dish Machines:**
 - a. Charge tank with 5 – 6 mils of this product per 4 liters of water.
 - b. Titrate wash water alkalinity to verify proper chemical concentration. Wash water should titrate to 50-70 ppm of active alkalinity.
 - c. Adjust dosage based on soil load, increase when necessary.

Carefully read and follow all statements on the labeling and Safety Data Sheet while using this product.
