

DAMP MOP

Floor Cleaner Concentrate

Damp Mop is a no-rinse floor cleaner concentrate that reduces the time and labor cost of daily maintenance for high-gloss floors. Fast drying, Damp Mop quickly and effortlessly removes dirt and other surface soils in heavily-trafficked areas and leaves no residue or haze to dull floor finish. With a pleasant lemon fragrance, Damp Mop is also biodegradable and phosphate-free.

DAMP MOP

FEATURES & BENEFITS

- Specifically formulated for maintaining high-gloss floor finishes
- Eliminates the need to rinse
- Will not dull, haze, or streak floor finish
- Extends the life of the finish
- Pleasant lemon scent
- Safe to use on all resilient type floorings such as asphalt, rubber, vinyl, terrazzo, ceramic, quarry tile, and all surfaces not harmed by water

RESPONSIBLE CHEMISTRY

- Biodegradable
- Phosphate free

SPECIFICATION DATA

Dilution	0.5 – 6 oz/gal
pH	7.0 – 8.0
Color	Yellow
Fragrance	Lemon
Density @ 24°C/75°F	8.32 lbs/gal
Specific Gravity @ 24°C/75°F	1.000
Viscosity @ 24°C/75°F	Water-thin
Flash Point (Cleveland Open Cup)	None
Stability: Shelf @ 24°C/75°F	1 year minimum
Stability: Accelerated @ 49°C/120°F	60 days minimum
Stability: Freeze/Thaw	Will withstand 1 cycle
Miscibility	Completely soluble in all proportions with hot or cold water
Rinsability	Rinses freely with hot or cold water and leaves no film

ORDERING INFORMATION

DIRECTIONS FOR USE

THE SINGLE-BUCKET SYSTEM

When using the single-bucket system for damp mopping floors, mix Damp Mop at 3 oz/gal. Experimentation with dilutions from 1:256 – 1:20 is recommended to achieve maximum cleaning performance.

- If floors are dirty, start damp mopping in a clean area and work toward the entrance or the dirty area.
- Never start at the doorway or entrance unless the entire floor is somewhat clean
- Use clean cotton mops when using Damp Mop for damp mopping.

THE DOUBLE-BUCKET SYSTEM

When using the double-bucket system for damp mopping floors, mix Damp Mop at 3 oz/gal. Experimentation with dilutions from 1:256 – 1:20 is recommended to achieve maximum cleaning performance. The first bucket is for your mopping solution, and the second is used for rinsing the mop during the mopping procedure.

1. Dip mop into the Damp Mop solution and lightly wring out mop. If the floor is extremely dirty, damp mop a 10' x 15' area or 150 ft²
2. Dip dirty mop into the clear water, rinse out, and wring dry.
3. Repeat until each 150 ft² section is clean.

THE SPRAY SYSTEM

When using the Spartasprayer for cleaning floors, use a 2-quart Spartasprayer or the 2 or 3-gallon pump-up sprayers. The Spartasprayer is ideal for inclement weather areas experiencing snow and heavy rains.

When using the Spartasprayer or the spray system, the following procedure is recommended:

1. Mix Damp Mop at 3 oz/gal. Experimentation with dilutions from 1:256 – 1:20 is recommended.
2. Spray an area of 10' x 10' or 10' x 15'.
3. Using clear water in your mop bucket, pick up the Damp Mop solution starting in the clean area first.
4. Dip mop into the clear water, rinse out, and wring dry.
5. Continue to work toward the entrance or most soiled area, picking up the sprayed Damp Mop cleaning solution.

CLEANING FLOORS USING AN AUTOMATIC SCRUBBER

When cleaning floors with an automatic scrubber, polishing pads should be used to clean highly-polished floors or experiment with scrub pads before cleaning the entire area. This will enable you to determine which pads do the best job when using Damp Mop.

1. For light cleaning, mix Damp Mop at 2 oz/gal. Experimentation with dilutions from 1:256 – 1:20 is recommended to achieve maximum cleaning performance.
2. For heavily-trafficked and soiled floors, mix Damp Mop at 3 oz/gal. Lay down the cleaning solution and pick up as you scrub.

LIGHT-DUTY SPOT CLEANING

Damp Mop may be used for light-duty cleaning on painted woodwork, tabletops, and fingerprints around light switches. Just mix 1 part Damp Mop to 10 parts water in a trigger sprayer bottle. Spray and wipe. Experimentation with dilutions from 1:256 – 1:20 is recommended.

DAILY DAMP MOPPING

Dilute 1:128 (1 oz/gal). Fill bucket. Mop with Damp Mop. Pick up the soil and excess cleaner with a clean mop. Rinse mop frequently and change solution as needed.

SAFETY: For institutional and industrial use only. Be sure to read all directions, precautionary and first aid statements on product labels before using this or any other Spartan product. If questions remain, consult your employer or a physician. Safety Data Sheets for all Spartan products are available from your authorized Spartan distributor and at www.spartanchemical.com. Workplace labels are available in English, Spanish, and French.

GUARANTEE: Spartan's modern manufacturing and laboratory control ensures uniform quality. If dissatisfied with performance of product, any unused portion may be returned for credit within 12 months of the date of manufacture.
