

CARBON & GREASE REMOVER

Spray-On Gel Aerosol

Carbon & Grease Remover is an effective cleaner that is safe to use on porcelain, glass, ceramics, stainless steel, and cast iron surfaces. The convenient spray-on gel formula clings to surfaces and provides rapid penetration and emulsification of tough soils such as baked-on carbon, grease, and food deposits. Offered in a versatile aerosol can, Carbon & Grease Remover can be used for cleaning commercial and institutional ovens, grills, griddles, char broilers, drip pans, hoods, rotisseries, and deep fat fryers.

CARBON & GREASE REMOVER

FEATURES

- Convenient, spray-on gel formula
- Use on either cold or pre-heated surfaces
- Non-flammable formula
- Safe for porcelain, glass, ceramics, stainless steel, and cast iron surfaces

BENEFITS

- Clings to vertical surfaces
- Penetrates and emulsifies tough soils
- Versatile - use on grills, rotisseries, stove burners, electric frying pans
- Complies with health and safety requirements for VOC restrictions

SPECIFICATION DATA

pH	12.5 – 14.0
Color	Beige
Fragrance	Mild
Specific Gravity @ 24°C/75°F	1.07
Flash Point (Propellant estimated)	-155°F/-104°C
Stability: Shelf @ 24°C/75°F	1 year minimum
Stability: Freeze/Thaw	1 cycle minimum

DIRECTIONS FOR USE

This effective cleaner is safe to use on porcelain, glass, ceramics, stainless steel, and cast iron surfaces. Keep spray or drippings away from the pilot lights, electrical connections, switches, receptacles, thermostats, heating elements, light bulbs, and other surfaces which might be affected by caustics. Avoid contact with painted or varnished surfaces, clothing, floor tile, linoleum, plastics, chrome, copper, aluminum, and coppertone surfaces. Not for use on self-cleaning or continuous cleaning ovens. Place newspaper under oven door to protect floor. Wear rubber gloves to avoid skin contact.

1. Clear food or excess debris from surface. Use on either cold or pre-heated surface (200°F/93°C and turned off). **Turn off pilot light and/or electric switch.**
2. Hold can upright and point spray button away from face. **Shake well**, then spray surface from a distance at 8 to 12 inches, giving it an even coating.
3. Spray top and bottom of surface first; then spray remaining surfaces and allowed to stand about 30 minutes. May be left on overnight in ovens with oven door closed.
4. Wipe treated surfaces clean with damp cloth, sponge, or paper towel. Spots that are difficult to remove should be treated and cleaned with a scouring pad. Rinse with potable water.
5. For ovens or other food-contact surfaces, heat surface to 400°F/204°C for 10 minutes before using with food again.
