

DA-70[®]

finish and wax stripper

A high dilution, heavy duty cleaner fortified with ammonia, DA-70 is also an excellent wax and finish stripper. It quickly penetrates, emulsifies and holds dirt and floor finish film in suspension until rinsed.

Providing Quality Maintenance and Chemical Specialty Solutions with Unparalleled Customer Service

Spartan Chemical Company, Inc.

FORTIFIED WITH AMMONIA:

DA-70 is formulated for those who like to use ammoniated products for their cleaning and wax removing tasks. DA-70 cleans quickly. Just apply, let set, agitate if necessary, and wipe off or pick up.

WON'T DAMAGE FLOORING:

DA-70 has no abrasives or solvents to damage resilient flooring. DA-70 penetrates and softens old wax and finish without any harmful effects. Safety is a prime factor. DA-70 has a pH of 11.6 to 12.2 and is dark red in color. DA-70 is formulated for those who like to maintain their floors at a high level of appearance.

DIRECTIONS FOR USE:

Some individuals may be sensitive to ingredients in this product. Before using, read product label and MSD sheet. Prevent pedestrian traffic with signs or barricades.

WAX AND FINISH STRIPPING:

1. Mix one part DA-70 to ten parts hot water 12 oz. per gallon.
2. Apply a liberal amount of DA-70 stripping solution to the floor.
3. Let set 5 to 10 minutes if DA-70 stripping solution starts to dry while waiting for it to work, reapply where necessary.
4. Using a stripping pad, machine strip thoroughly.
5. Squeegee the stripping solution to a central location and pick up with a mop or a wet/dry vacuum.

6. Rinse thoroughly with cool water. Two or 3 rinses are recommended. Change your rinse water often.
7. Allow the floor to dry completely before sealing and finishing.
8. If floors have no apparent build up, dilute 1 part DA-70 to 10 parts hot water and follow the above directions.

Many customers prefer an ammoniated product over a regular all purpose cleaner. DA-70 is a heavy duty all purpose cleaner, so it is important to demonstrate both SD 20 and DA-70, giving the customer a choice.

AS A HEAVY-DUTY CLEANER:

DA-70 is excellent for cleaning asphalt, tiles, vinyl, linoleum, rubber, terrazzo, marble, and concrete. The suggested dilution is one part DA-70 to 50 parts water.

- When cleaning painted walls, dilute one part DA-70 to 50 parts water. When cleaning walls, start from the bottom and work up. Rinsing usually is not necessary.
- Leather and plastic are cleaned beautifully when mixing one part DA-70 to 30 parts water. Just spread evenly over the surface, let set a moment, and wipe up with a damp cloth or a sponge.
- DA-70 can be used for cleaning glass. Dilute one part DA-70 to 150 parts water.
- After the winter snow storm, DA-70 is excellent for cleaning road signs. Dilute 1 part DA-70 to 30 parts water. Use brush where necessary.

- Ceramic and porcelain will come clean when using 1 part DA-70 to 50 parts water. Apply with a sponge and wipe dry with a cloth or a chamois.
- White side wall cleaning is done easily when DA-70 is diluted 1 part DA-70 to 15 parts water. Just apply, agitate with brush, and hose off.

Be sure to read all Directions, Precautionary and First Aid Statements on product labels before use of this or any Spartan product. If questions remain, consult your employer or a physician. Material Safety Data Sheets for all Spartan products are available from your authorized Spartan distributor or by visiting www.spartanchemical.com.

SPECIFICATIONS:

- Specific Gravity - .994
- pH Concentrate - 11.6 - 12.2
- Flash Point - 212°F
- Stability:
 - a. Shelf @ 24°C/75°F - in excess of one year
 - b. Accelerated @ 49°C/120°F - in excess of 90 days
 - c. Freeze/Thaw Cycle - freezes and thaws with complete clarity
