Food Processing
sanitation made simple℠

PROTECT YOUR BRAND℠
- Cleaning & sanitation solutions
- Eliminate foodborne pathogens
- Support efforts with GFSI, FSMA, SQF, BRC, HACCP, etc.
- Local training, service, and support
For over 60 years Spartan has earned wide recognition for its high quality, high performance products. Spartan Research and Development Laboratories are GLP compliant (Good Laboratory Practices). FDA (Food & Drug Administration) regulated products are manufactured in CGMP production facilities (Current Good Manufacturing Practices). All products are extensively field tested to meet the ever-changing needs for improved sanitation in the food industry. Spartan products are so good, they’re guaranteed!

**Energy Efficient**
- Spartan’s cleaners, degreasers and sanitizers perform well in hot, warm, or cold water

**Compliance with Regulations**
- Production facility FDA Registered
- Products are developed to assist compliance with the Food Safety Inspection Service (FSIS), Food Quality Protection Act, FDA Food Code Book, OSHA, and other guidelines

**Economical**
- Right products combined with training minimizes labor
- Focus on in-use cost
- Application-specific dispensing systems

**Employee Training**
- Charts, videos, and product applications
- CompuClean® Sanitation Management Software
- CleanCheck® Training Program
- 9 step sanitation training program
Technical Support

• 70 highly-trained Spartan Regional Managers are readily available for field support

• Validate cleaning with ATP units, which use bioluminescence to verify and validate that a surface has been cleaned. ATP units are available for a discount through Hygiena (www.hygiena.net).

• We can help make sure your Sanitation Program is in compliance with third-party audits (SQF, BRC, AIB, etc.)

Environmental Commitment

• Conform to or surpass strict guidelines of the EPA Clean Water Act

• Spartan products are packaged in recyclable, reusable, and/or disposable containers

Recent reports of E. coli, salmonella, listeria, cryptosporidium, and cyclospora outbreaks in the meat, poultry, vegetable, and fruit processing industries have resulted in tragic loss of life, serious public concern, and tremendous loss of profits.

This situation presents a new paradigm for food processors... the need to implement more effective food safety functions and comply with FDA and other performance-oriented standards, such as the Hazard Analysis and Critical Control Points (HACCP) Systems, that regulate the meat and poultry industries while maintaining minimal operating costs.

Spartan’s Food Plant Sanitation Program includes all the essential elements needed to ensure a clean, sanitized facility. It provides products, equipment, appropriate procedures, and worker-hygiene visual aids to prevent direct product contamination or adulteration and assist the elimination of foodborne bacteria.
