**COLOR AND NUMBER SYSTEM:**

Each SparClean product is color and number coded for easy product identification. All product references and labels reflect this color and number, making training short and simple.

**PACKAGING:**

All SparClean products are packaged in translucent 5-gallon pails and gallons. The clear packaging allows you to see exactly what remains in your container and enables timely reorder of your warewash products. SparClean Sanitizer 54 is also packaged in a closed system gallon to reduce possibility of contact with product.

**SUPPORT ACCESSORIES:**

Several dispensing options are available to complement the SparClean warewash line of products. We will also smooth your transition with training materials such as a general application SparClean Warewash Wall Chart.

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Note: This product degrades with age. Use a chlorine test kit and adjust dosage as necessary to obtain the required level of available chlorine.**

**TABLEWARE SANITIZER FOR MECHANICAL SPRAY DISHWASHING MACHINES**

This product is applied in the final sanitization cycle of low temperature dishwashing machines.

All items to be sanitized must be clean before application of this product.

Adjust dishwasher's chemical dispensing device to meter proper amount of product into the dishwashing machine.

For sanitizing tableware in low temperature dishwashing machines, inject SparClean Sanitizer 54 into final rinse water at a concentration of 100 ppm available chlorine (2 oz. product into 13 gallons of water). Do not allow concentration to fall below 50 ppm. Do not exceed 200 ppm. Test sanitizer frequently during operation with a chlorine test kit to ensure that solution does not drop below 50 ppm available chlorine.

When sanitization cycle is complete, remove sanitized tableware from the dishwashing machine and allow items to air dry. Do not rinse items with water after sanitizing.

Sanitizer used in automatic systems may be used in the general cleaning process but may not be reused for sanitizing purposes.

If a chlorine test kit is not available, a starting concentration of 200 ppm should be used (4 oz. product into 13 gallons of water).

Local public health codes vary with regard to the concentration of available chlorine permitted in the final rinse water of chemical sanitizing dishwashing machines. Check with your local public health department for the regulations in your area.

Note: Do not use on silver, silver plate or pewter as these metals may darken.

**Be sure to read all Directions, Precautionary and First Aid Statements on product labels before use of this or any Spartan product. Material Safety Data Sheets for all Spartan products are available from your authorized Spartan distributor or at [www.spartanchemical.com](http://www.spartanchemical.com).**

**SPECIFICATION DATA:**

8.4% Sodium hypochlorite (8% available chlorine)  
 pH – 12.0 - 13.0  
 Color – Yellow  
 Stability -

Degrades with age and heat. For best shelf life, store below 85°F and keep out of sunlight or other bright lights

Can withstand three freeze/thaw cycles

Each SparClean product is formulated to comply with various regulations. Consult Spartan's Letter of Guaranty for specifics.
