

Airlift Scentre®

AUTOMATIC FRESHENING SYSTEM

PRODUCT DESCRIPTION:

Airlift Scentre is a new, revolutionary way to provide 24 hour deodorized freshness. This battery-operated air deodorizing system allows 100% complete airflow and continuous release of fragrance. And with Airlift Scentre freshening up to 150 square feet of surface area, it's far more effective than gels and most liquids.

EMPLOYEE SATISFACTION:

Airlift Scentre's attractive, self-adhesive backed cabinet insures a quick and easy installation. When changing the cartridge, there are no clumsy battery manipulations or liquids to spill, so the switch is effortless and spotless.

NEW DESIGN:

The new and improved Airlift Scentre cabinet features a flow adjuster knob to determine fragrance intensity; tailoring fragrance level to each individual's preference. The cartridge brackets have also been reinforced to insure greater durability through usual wear and tear.

VARIETY OF SCENTS:

Airlift Scentre provides a full 30 days fragrance for almost every preference. The scents available are NABC Fresh Scent for light to medium fragancing, while Cherry and Pina Colada are offered for those that require a stronger scent.

PACKAGING:

Airlift Scentre is available in three fragrances. An Introductory Package includes one new and improved cabinet and three fragrance cartridges complete with batteries. A case of refill fragrance includes six cartridges and six batteries.

GUARANTEE:

Spartan's modern manufacturing and laboratory control insure uniform quality. If dissatisfied with performance of product, any unused portion may be returned for credit within one year of the date of manufacture.
